

## Property Information Sheet

### Name and Address

Alan  
12 Rastrick Close,  
Bridgnorth,  
Shropshire,  
WV16 5AR

### Property Description

Modern end terraced house on a 2010 built estate in Bridgnorth. Concrete tiled roof that is well insulated.

### What changes have you made to your home / what green features did your home come with?

In 2011, we had 10 solar photovoltaic (PV) panels fitted on our roof. April of this year, we fitted a 4.6kW air source heat pump (ASHP).

### Why did you make these changes / choose a home with these features?

We want to do our part in tackling climate change.

### What were the approximate costs of each of the changes you made?

The ASHP cost us approximately £2,500 as we were awarded £7,500 on top of this from a government grant. The solar PV panels were roughly £10,000 in total whilst the electric car charger cost £800.

### What have been the approximate energy savings?

Energy savings are not fully clear yet as the ASHP was recently installed.

What have been the benefits to you / your home?

We have been able to save on electricity costs which have been of real benefit to us.

Who undertook the work?

EnergyZone undertook the retrofit work.

Would you recommend them?

Yes, most definitely.

What else would you like to do?

Nothing at present.

Have you considered any measures but rejected them? Please give details of what and why.

N/A

Any further comments?
